BUILDING DETAILS

The D. L. Clark Office Building offers the finest quality equipment and state-of-the-art building systems.

Heating Ventilation & Air Conditioning:

Heating, cooling and fresh air is supplied to the office space by a VAV system consisting of four Mammoth-brand rooftop units providing a total of over 500 tons of cooling capacity for the Building. Two 3-million BTU gas-fired boilers are located at the rooftop penthouse to provide ample heat when required. Further distribution and individual tenant control is offered through 1,200 CFM VAV boxes or fan-powered boxes and thermostats for approximately every 1,200 SF of floor space.

Lessor shall provide heating, ventilation and air conditioning to the leased premises Monday through Friday, 8:00 a.m. to 6:00 p.m. plus Saturday, 8:00 a.m. to 1 p.m. Notifying the Lessor 48 hours in advance can turn on the Building system. The additional hours of operation would be billed to the lessee on an hourly rate of \$19.50 per unit over and above the lease rate. This hourly number is only a first-year estimated quote. The normal operation of HVAC is designed for the range of 70° to 75°.

Elevators:

Minimal waiting times are assured by four state-of-the-art, microprocessor-controlled, high speed traction elevators. Two freight elevators are also maintained for the convenience of the tenants. One freight elevator has a 4,000-lb. capacity; one freight elevator has a 3,000-lb. capacity.

Stairwells:

The Building is equipped with four interior stairwells, which service all levels of the structure.

Fire Protection:

The Building is completely protected by modern fire suppression, emergency lighting and fire alarm systems. Building is 100% sprinklered by an overhead wet system.

Windows:

The large windows are highly energy efficient since they are triple-glazed with two layers of glass and one layer of a space-age heat reflecting film called "Heat Mirror". These windows allow the tenant to enjoy a wide panorama while reflecting the intense summer heat and minimizing infiltration of cold air in the winter.

Plumbing:

Large ceramic tiled bathrooms are on each floor and "wet columns" are available to satisfy any need for additional plumbing within the tenant space.

Electrical:

Electrical power is supplied through completely new electrical systems. The Building has a 3,000 Amp main service that can supply 277/480-voltage power. For an additional cost, 120/208-volt service is available.

New service is four-wire, three-phase 227/480-volt with 120/208-volt transformers at each floor. Fluorescent lighting is single-phase 277 volt at average lighting level of 3.5 watts per square foot. Electrical distribution will be via a bus duct riser; therefore, separate metering is possible. Design capacity for electrical outlets and miscellaneous appliances is average on 3-watt per square foot.

Telephones:

We provide telephone closet space on each floor with empty conduit for running of individual Tenant telephone cable to the telephone closet.

Basement:

Unfinished area is available for storage.

Security:

The building has twenty-four (24) hour manned security in the building lobby seven (7) days a week.

Security guards provide tenants' employees with escort service to the designated parking areas upon request. The building has twenty-nine (29) security cameras mounted for viewing at the guard's desk. The elevators have a key-lock system after 6 p.m.

Amenities:

- ▶ Clark Bar & Grill - First Floor: A family-owned and operated Pittsburgh tradition, serving the North Shore since 1989. Artfully lined with unique and rare sports memorabilia, it's the ideal setting for lunch, dinner, happy hour or game days. In addition, the cigar lounge provides the ultimate environment for experiencing your favorite cigars and spirits.
- ▶ **Free Fare Zone:** The extended light rail line runs from Downtown Pittsburgh to the North Shore. The T's Free Fare Zone has been extended to the North Side Station at West General Robinson Street Garage and Allegheny Station. Visit www.tplus.org for train schedules.
- ▶ Convenient access to Nova Place II, PNC Park, and Heinz Field. Area restaurants include Hyde Park Prime Steakhouse, McFadden's Restaurant & Tavern, Burgatory, Bar Louie, Jerome Bettis' Grille 36, and more.
- ▶ With over 2,000 parking spaces surrounding the D. L. Clark Building, tenants are provided with convenient surface parking opportunities.
- ▶ Four hotels are located within a two-block radius of the D. L. Clark Building.
